File: USPT

Sep 26, 2000

DOCUMENT-IDENTIFIER: US 6122877 A

TITLE: Fiber-polymeric composite siding unit and method of manufacture

DEPR:

Thermal conductivity is the ratio of the steady-state heat flow (heat transfer per unit area per unit time) along a long rod to the temperature gradient along the rod. Thermal conductivity indicates the ability of a material to transfer heat from one surface to another surface.
